DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see pages 4-7, filed May 2, 2005, with respect to claims 1, 2 and 5 have been fully considered and are persuasive. The rejection of claims 1, 2 and 5 has been withdrawn.

Election/Restrictions

2. Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 3, 4, 6-45, directed to the species of an AC plane discharge plasma display panel are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim. However, claims 46-48, 50-52 and 55-97, directed to the species of an AC plane discharge plasma display panel remain withdrawn from consideration since claims 46, 48, 50-52 and 55-97 does not depend upon or otherwise include all the limitations of an allowed generic claim as required by 37 CFR 1.141.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

3. This application is in condition for allowance except for the presence of claims 46, 48, 50-52 and 55-97 non-elected without traverse. Accordingly, claims 46, 48, 50-52 and 55-97 have been cancelled.

Allowable Subject Matter

4. Claims 1-45 are allowed.
5. The following is an examiner's statement of reasons for allowance:

Regarding to independent claim 1, prior art of record taken alone or in combination fails to teach or suggest an AC plane discharge plasma display panel comprising: one sustain electrode is provided for a pair of first and second pixel cells adjacent to each other in the column direction, and the one sustain electrode is positioned above alternating the row ribs, and wherein the one sustain electrode has two sustain-side bus electrodes connected to it and in combination with other claimed features of the present claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following prior art are cited to further show the state of the art of composition of an AC plane discharge plasma display panel.
